BASIS Code Warriors' Challenge
Battle #1 (PHP Track)

Tasks:

1. Implement the "I'm attending" functionality using AJAX

2. Add commenting support for events

3. Allow uploading of event logo in event creation form

4. Add front-end and back-end validation on all forms

5. Implement "Submit Talk" functionality

6. Allow multiple categories for events in event creation form

7. Add tagging support for talks and create page to show talks by tag

8. Add security measures to prevent XSS and SQL injection

9. Add star rating functionality of talks

10. Allow logged in user to enter their name and use that instead of their email

11. Add clean URL support

12. Add pagination on all required pages

13. Add search functionality for both events and talks

14. Add a widget of "Who's attending" on event page sidebar using Gravatar

15. Add any other authentication mechanism (Facebook/Twitter/LinkedIn etc.)
